

Spring School on “Connected Health” – A unique opportunity to invest in your future career

Experience innovation and entrepreneurship in a 2-week hands-on course module, in close cooperation with B/S/H!

“Connected Health” is an increasingly relevant theme, with an estimated market growth to more than \$117 billion by 2020. Grab the opportunity now to develop business ideas and prototypes addressing this theme in interdisciplinary teams (Design, Engineering, Computer Science, Business) and supported by experts from B/S/H. Hack the connected home of the future for a healthier life!

Your benefits:

- A hackable household appliance from B/S/H
- 500 € prototyping budget per team
- 1 month access to MakerSpace, the 1,500 square meter high-tech workshop in Garching
- Practical experience in the intersection of two prominent trends: “Connectivity” and “Healthy Living”
- Personal contacts and mentoring from B/S/H
- Feedback from a select jury in your final pitch presentation (experts from B/S/H, TUM and UnternehmerTUM)
- Up to 6 ECTS (faculty-dependent)

Spring School takes place during 10 consecutive weekdays in the first half of March.

Apply until February 21, 2016
by sending your CV to koca@unternehmertum.de
